

Dragonfly Craft

Materials:

- Popsicle stick
- Crayons/markers/colored pencils
- 2 pipe cleaners
- Glue
- Googly eyes

Directions:

- Decorate and color your popsicle stick however you want! We decorated ours with the female Eastern Pondhawk dragonfly in mind.
- Create two sets of dragonfly wings.
 - Take one pipe cleaner and loop into a figure 8 shape. Twist the ends in the middle to keep the figure 8 in place. Picture shown below.
 - Repeat with the second pipe cleaner.
- Glue the pipe cleaner wings slightly above the center of the popsicle stick. This is roughly where the thorax of the insect would be located, and where the wings would naturally be attached.
- Glue large googly eyes at the top of the popsicle stick. Dragonfly eyes are huge compared to their head. Oversized googly eyes are perfect!
